

Care.data

The NHS wants to use your information to get a complete picture of what is happening across health and social care and to plan services according to what works best. This new system will provide joined-up information about the care received from all of the different parts of the health service, including hospitals and GP practices.

Your date of birth, full postcode, NHS Number and gender as well as medical information will be extracted from your doctors computer system. The type of information shared, and how it is shared, is controlled by law and strict confidentiality rules. The HSCIC ensures that you will not be identifiable from the information shared with other organisations.

If you do not want this to happen to your data please sign the declaration below

Declaration

Please tick either one or both boxes below
